   Stemme AG  
   Flugplatzstrasse F2 Nr. 6-7  
   15344 Strausberg

6. LBA Certification Application Date: 30. May 1985

7. LBA Type Certification Date: 31. December 1990

8. This TCDS replaces LBA TCDS No. 846

A.II. Certification Basis

2. Airworthiness Requirements: Joint Airworthiness Requirements for Sailplanes and Powered Sailplanes (JAR 22), effective on June 27, 1989 (Change 4 of the English Original Issue)

Preliminary Standard for the Substantiation of Indirect Drive Shafts in Power Plants of Powered Sailplanes (JAR 22) (with modifications for S10), dated 05.08.1988. JAR-22.375 from amendment 22/90/1 (Winglets)

4. Special Conditions: None
5. Exemptions: None
6. Equivalent Safety Findings: None
7. Environmental Standards: ICAO Annex 16, Volume I (for more details see EASA TCDSN A.054)

**A.III. Technical Characteristics and Operational Limitations**

   Document Record STEMME S10, doc. no. A08-10-000, am.-index 02.a, dated Okt. 17, 1994, LBA approved
   Record of Service Bulletins and Airworthiness Directives, Doc.No. P150-981001 in the actual revision.

2. **Description:** Selflauching, twin-seat, all composite construction powered sailplane, with the engine mounted in the center fuselage, propeller shaft system and fully foldable, jointed propeller, 3-piece wing, double panel Schempp-Hirth type airbrakes on the upper wing surface, optional winglets (see V.8). Retractable main landing gear with brake, T-tail (fixed horiz. stabilizer with elevator) fin and rudder.

3. **Equipment:** Min. Equipment:
   - 1 Air speed indicator (up to 300 km/h)
   - 1 Altimeter
   - 1 Magnetic compass
   - 1 RPM indicator
   - 1 Oil pressure indicator
   - 1 Oil temperature indicator
   - 1 Cylinder head temperature indicator
   - 1 Engine hour meter
   - 2 Fuel quantity indicator
   - 2 Stallwarning indicator
   - 2 4-Point harness (symmetrical)
   - 2 Automatic or manual parachute
   - or
   - 2 Back cushion (thickness approx. 10 cm / 3.94 in. when compressed), when flying without parachute

   Additional Equipment refer to Flight and Operating Manual

4. **Dimensions:**
   - **Span** 23.0 m
   - **Wing area** 18.74 m²
   - **Length** 8.42 m
5. Engine

Limbach L 2400 EB1.AD
EASA Type Certificate Data Sheet No. EASA.E.084
Remark:
Former name of the engine: L 2400 EB1.D. See also Service Bulletin no.17 of company Limbach.

5.1 Engine Limits:

- Maximum Power RPM: 3400 rpm
- Maximum Continuous Power RPM: 3000 rpm

6. Propellers:

Stemme 10AP-N
LBA-Type Certificate Data Sheet 32.100/1 dated Nov. 16th 1990

6.1 Propeller diameter:

1610 mm +/- 2 mm

7. Fluids and Fluid capacities:

- Wing tank left: 45.00 l
- Wing tank right: 45.00 l
- Non-usable amount of fuel: 1.5 l
- Optional tank capacity 2 x 60 l (see also V. 6)

8. Launching Hooks:
None

9. Weak links:
None

10. Air Speeds:

- Manoeuvring Speed $V_A$: 180 km/h
- Never Exceed Speed $V_{NE}$: 270 km/h
- at flap setting -10°, -5°, 0° $V_{FE}$: 270 km/h
- at flap setting +5°, +10° $V_{FE}$: 180 km/h
- at flap setting L (+16°) $V_{FE}$: 140 km/h

Maximum permitted speeds:
- in rough air $V_{RA}$: 180 km/h
- max gear operating speed $V_{LO}$: 140 km/h

11. Operational Capability:

Approved for VFR-Day.
VFR Night limited to the vicinity (range of glide ratio) of active airfields approved for night flight operations (see V.9)

12. Maximum Masses:

- Max. Mass: 850 kg
- Max. Mass of Non-Lifting Parts: 570 kg

13. Centre of Gravity Range:

Datum: Inner wing leading edge, where upper side of fuselage boom placed at slope 1000 : 84

- Forward Limit: 254 mm aft of datum point
- Rearward Limit: 420 mm aft of datum point

14. Seating Capacity:

2

15. Lifetime limitations:

Refer to Maintenance Manual

16. Deflection of control surfaces:

Refer to Maintenance Manual
A.IV. Operating and Service Instructions

3. Operating and Maintenance Manual for the engine Limbach L 2400 and series.

A.V. Notes

1. Manufacturing is confined to industrial production.
2. All parts exposed to sun radiation – except the areas for markings and registration – must have a white colour surface.
3. For issuance of the Certificate of Airworthiness pertinent to an individual aircraft the Noise Protection Requirements effective on the day of application are applicable.
4. Only to the s/n 10-3 to 10-10 differing operational limits as well as data are defined by Stemme company in modification bulletins LBA-approved, belonging to the individual s/n.
5. The type certification is valid for the s/n: 10-3 up to 10-10 and starting with 10-12.
6. The optional equipment with 2 x 60 l tanks ex works is allowed according to the modification bulletin Stemme A30-92-077, LBA-approved.
7. Conversion from the model Stemme S10 into the model Stemme S10-V is allowed according to the Stemme Service Bulletin A31-10-010, LBA-approved.
8. The optional equipment with winglets is allowed according to the Service Bulletin Stemme A31-10-023, LBA-approved.
9. VFR Night limited to the vicinity (range of glide ratio) of active airfields approved for night flight operations is allowed when the powered sailplane is equipped for this operation according to national rules and Service Bulletin Stemme A31-10-044 LBA-approved and A31-10-072 EASA-approved.
Section B: Stemme S10-V
B.I. General

1. Data Sheet No.: EASA.A.054
2. a) Type: Stemme S10
   b) Variant: Stemme S10-V
3. Airworthiness Category: Powered Sailplane, JAR 22 - Utility
4. Type Certificate Holder: Stemme AG
   Flugplatzstrasse F2 Nr. 6-7
   15344 Strausberg
   Germany

5. Manufacturer: Stemme GmbH & Co. KG
   Gustav-Meyer-Allee 25
   13355 Berlin

Stemme GmbH & Co. KG
Flugplatzstrasse F2 Nr. 7
15344 Strausberg

Stemme AG
Flugplatzstrasse F2 Nr. 7
15344 Strausberg

6. LBA Certification Application Date: 03. February 1992
7. LBA Type Certification Date: 16. September 1994
8. This TCDS replaces LBA TCDS No. 846

B.II. Certification Basis

1. Certification Basis: Defined by LBA letter I 414-846/7/94,
2. Airworthiness Requirements: Joint Airworthiness Requirements for Sailplanes and
   Powered Sailplanes (JAR 22), effective on June 27, 1989
   (Change 4 of the English Original Issue)
3. Requirements elected to comply: Standards for Structural Substantiation of Sailplane and
   Powered Sailplane Components Consisting of Glass or
   Preliminary Standards for the Substantiation of the Electrical
   Standards for the Substantiation of the Electrical System of
Preliminary Standard for the Substantiation of Indirect Drive Shafts in Power Plants of Powered Sailplanes (JAR 22) (with modifications for S10), dated 05.08.1988.
NPA 22E-XX (Proposed Amendment to JAR 22 for Variable Pitch Propellers), Issue March 25, 1993.
JAR-22.375 from amendment 22/90/1 (Winglets)

4. Special Conditions: None
5. Exemptions: None
6. Equivalent Safety Findings: None
7. Environmental Standards: ICAO Annex 16, Volume I (for more details see EASA TCDSN A.054)

B.III. Technical Characteristics and Operational Limitations

1. Type Design Definition: Document Record No. A08-10-000, am-index 02.a, dated October 17th, 1994 (record of the documents defining Type Stemme S10), LBA approved.
in addition:
Document Record No. A08-10-039, am-index 03.c, dated Sept. 21, 1994 (supplement for Model S 10-V), LBA approved.
Record of Service Bulletins and Airworthiness Directives, Doc.No. P150-981002 in the actual revision.

2. Description: Selflaunching, twin-seat, all composite construction powered sailplane, with the engine mounted in the center fuselage, propeller shaft system and fully foldable, jointed variable pitch propeller CFRP, 3-piece wing, double panel Schempp-Hirth type airbrakes on the upper wing surface, optional winglets (see V.6). Retractable main landing gear with brake, T-tail (fixed horiz. stabilizer with elevator) fin and rudder.
3. **Equipment:**

   **Min. Equipment:**
   1. Air speed indicator (up to 300 km/h)
   2. Altimeter
   3. Magnetic compass
   4. RPM indicator
   5. Oil pressure indicator
   6. Oil temperature indicator
   7. Cylinder head temperature indicator
   8. Engine hour meter
   9. Fuel quantity indicator
   10. Stall warning indicator
   11. Indicator for Takeoff (low pitch) propeller position
   12. 4-Point harness (symmetrical)
   13. Automatic or manual parachute
      or
   14. Back cushion (thickness approx. 10 cm / 3.94 in. when compressed), when flying without parachute

   **Additional Equipment refer to Flight and Operating Manual**

4. **Dimensions:**

   **Span:** 23.0 m
   **Wing area:** 18.74 m²
   **Length:** 8.42 m

5. **Engine**

   **Limbach L 2400 EB1.AD**
   EASA Type Certificate Data Sheet EASA.E.084
   **Remark:**
   Former name of the engine: L 2400 EB1.D. See also Service Bulletin no.17 of company Limbach.

5.1 **Engine Limits:**

   - Maximum Power RPM: 3400 rpm
   - Maximum Continuous Power RPM: 3000 rpm

6. **Propellers:**

   Stemme 10AP-F
   LBA-Type Certificate Data Sheet 32.100/4 dated Nov. 12th 2003

   Stemme 10AP-V
   LBA-Type Certificate Data Sheet 32.100/2 dated August 9th 1994

6.1 **Propeller diameter:**

   Both Propellers 1610 mm +/- 3 mm

7. **Fluids and Fluid capacities:**

   - Wing tank left: 45.00 l
   - Wing tank right: 45.00 l
   - Non-usable amount of fuel: 1.5 l
   - Optional tank capacity 2 x 60 l (see also V. 5)

8. **Launching Hooks:**

   None

9. **Weak links:**

   None
10. **Air Speeds:**
   - Manoeuvring Speed $V_A \quad 180 \text{ km/h}$
   - Never Exceed Speed $V_{NE} \quad 270 \text{ km/h}$
   - at flap setting -10°, -5°, 0° $V_{FE} \quad 270 \text{ km/h}$
   - at flap setting +5°, +10° $V_{FE} \quad 180 \text{ km/h}$
   - at flap setting L (+16°) $V_{FE} \quad 140 \text{ km/h}$

   Maximum permitted speeds
   - in rough air $V_{RA} \quad 180 \text{ km/h}$
   - max gear operating speed $V_{LO} \quad 140 \text{ km/h}$

11. **Operational Capability:**
   - Approved for VFR-Day.
   - VFR Night limited to the vicinity (range of glide ratio) of active airfields approved for night flight operations (see V.8)

12. **Maximum Masses:**
   - Max. Mass 850 kg
   - Max. Mass of Non-Lifting Parts 570 kg

13. **Centre of Gravity Range:**
   - Datum: Inner wing leading edge, where upper side of fuselage boom placed at slope 1000 : 84
   - Forward Limit 254 mm aft of datum point
   - Rearward Limit 420 mm aft of datum point

14. **Seating Capacity:**
   - 2

15. **Lifetime limitations:**
   - Refer to Maintenance Manual

16. **Deflection of control surfaces:**
   - Refer to Maintenance Manual

**B.IV. Operating and Service Instructions**

1. Flight manual for the powered sailplane type STEMME S10-V, Issue Sep. 6, 1994, LBA –approved, or later approved revisions.

3. Operating and Maintenance Manual for the engine Limbach L 2400 and series.

5. Small Repair Manual (Document A35-10-SMR), revision 02.a dated October 13th 1997, or later approved revisions.

**B.V. Notes**

1. Manufacturing is confined to industrial production.

2. All parts exposed to sun radiation – except the areas for markings and registration – must have a white colour surface.
3. For issuance of the Certificate of Airworthiness pertinent to an individual aircraft the Noise Protection Requirements effective on the day of application are applicable.

4. The Variant Certification is effective from Serial No. 14-001 onwards.

5. The optional equipment with 2 x 60 l tanks ex works is allowed according to the modification bulletin Stemme A30-92-077, LBA-approved.

6. The optional equipment with winglets is allowed according to the Service Bulletin Stemme A31-10-023, LBA-approved.

7. The optional equipment of the variant Stemme S10-V with the „Fixed Pitch Propeller“ Stemme 10AP-F is allowed according to the Service Bulletin Stemme A31-10-067, EASA-approved.

8. VFR Night limited to the vicinity (range of glide ratio) of active airfields approved for night flight operations is allowed when the powered sailplane is equipped for this operation according to national rules and Service Bulletin Stemme A31-10-044 LBA-approved and A31-10-072 EASA-approved.
Section C: Stemme S10-VT

C.I. General

1. Data Sheet No.: EASA.A.054
2. a) Type: Stemme S10
   b) Variant: Stemme S10-VT
3. Airworthiness Category: Powered Sailplane, JAR 22 - Utility
4. Type Certificate Holder: Stemme AG
   Flugplatzstrasse F2 Nr. 6-7
   15344 Strausberg
   Germany
5. Manufacturer: Stemme GmbH & Co. KG
   Flugplatzstrasse F2 Nr. 7
   15344 Strausberg
   Stemme AG
   Flugplatzstrasse F2 Nr. 7
   15344 Strausberg
   Stemme AG
   Flugplatzstrasse F2 Nr. 6-7
   15344 Strausberg
6. LBA Certification Application Date: 16. August 1996
7. LBA Type Certification Date: 15. August 1997
8. This TCDS replaces LBA TCDS No. 846

C.II. Certification Basis

1. Certification Basis: Defined by LBA letter I 413-846/97,
2. Airworthiness Requirements: Joint Airworthiness Requirements for Sailplanes and
   Powered Sailplanes (JAR 22), effective on June 27, 1989
   (Change 4 of the English Original Issue)
3. Requirements elected to comply: Standards for Structural Substantiation of Sailplane and
   Powered Sailplane Components Consisting of Glass or Carbon Fibre Reinforced
   Plastics, Issue July. 1991
   Standards for the Substantiation of the Electrical System of
   Preliminary Standard for the Substantiation of Indirect Drive Shafts in Power Plants of Powered
   Sailplanes (JAR 22) (with modifications for S10), dated 05.08.1988.
   NPA 22E-XX (Proposed Amendment to JAR 22 for Variable Pitch Propellers), Issue March 25, 1993.
   JAR-22.375 from amendment 22/90/1 (Winglets)
4. Special Conditions: None
5. Exemptions: None
6. Equivalent Safety Findings: None
7. Environmental Standards: ICAO Annex 16, Volume I (for more details see EASA TCDSN A.054)

C.III. Technical Characteristics and Operational Limitations

   In addition:
   Record of Service Bulletins and Airworthiness Directives, Doc.No. P150-981003 in the actual revision.

2. Description: Selflaunching, twin-seat, all composite construction powered sailplane, with the liquid cooled, turbocharged engine mounted in the center fuselage, propeller shaft system and fully foldable, jointed variable pitch propeller CFRP, 3-piece wing, double panel Schempp-Hirth type airbrakes on the upper wing surface, optional winglets (see V.6). Retractable main landing gear with brake, T-tail (fixed horiz. stabilizer with elevator) fin and rudder.

3. Equipment: Min. Equipment:
   1 Air speed indicator (up to 300 km/h)
   1 Altimeter
   1 Magnetic compass
   1 RPM indicator
   1 Oil pressure indicator
   1 Oil temperature indicator
   1 Cylinder head temperature indicator
   1 Engine hour meter
   2 Fuel quantity indicator
   Stallwarning indicator
   1 Indicator for Takeoff (low pitch) propeller position
   2 4-Point harness (symmetrical)
   2 Automatic or manual parachute or
   2 Back cushion (thickness approx. 10 cm / 3.94 in. when compressed), when flying without parachute

   Additional Equipment refer to Flight and Operating Manual

4. Dimensions: 
   Span 23.0 m
   Wing area 18.74 m²
   Length 8.42 m

5. Engine Rotax 914 F2/S1
   LBA-Engine Type Certificate Data Sheet No. 5006, dated: Aug. 14th 1997
   Remark:
   Rotax 914 F2 modified for the use in the Stemme S10-VT
5.1 Engine Limits:  
Maximum Power RPM  5800 rpm  
Maximum Continuous Power RPM  5500 rpm

6. Propellers:  
Stemme 11AP-V  
LBA-Type Certificate Data Sheet 32.100/3 dated Aug. 05th 1997

6.1 Propeller diameter:  
1630 mm +/- 3 mm

7. Fluids and Fluid capacities:  
Wing tank left:  45.00 l  
Wing tank right:  45.00 l  
Non-usable amount of fuel:  1.5 l  
Optional tank capacity 2 x 60 l (see also V. 5)

8. Launching Hooks:  
None

9. Weak links:  
None

10. Air Speeds:  
Manoeuvring Speed  $V_A$  180 km/h  
Never Exceed Speed  $V_{NE}$  270 km/h  
- at flap setting -10°, -5°, 0°  $V_{FE}$  270 km/h  
- at flap setting +5°, +10°  $V_{FE}$  180 km/h  
- at flap setting L (+16°)  $V_{FE}$  140 km/h  

    Maximum permitted speeds  
    - in rough air  $V_{RA}$  180 km/h  
    - max gear operating speed  $V_{LO}$  140 km/h

11. Operational Capability:  
Approved for VFR-Day.  
VFR Night limited to the vicinity (range of glide ratio) of active airfields approved for night flight operations (see V.7)

12. Maximum Masses:  
Max. Mass  850 kg  
Max. Mass of Non-Lifting Parts  570 kg

13. Centre of Gravity Range:  
Datum: Inner wing leading edge, where upper side of fuselage boom placed at slope 1000 : 84  
Forward Limit  254 mm aft of datum point  
Rearward Limit  420 mm aft of datum point

14. Seating Capacity:  
2

15. Lifetime limitations:  
Refer to Maintenance Manual

16. Deflection of control surfaces:  
Refer to Maintenance Manual
C.IV. Operating and Service Instructions

3. Operating and Maintenance Manual for the engine see Maintenance Manual for the Powered Sailplane STEMME S10-VT section E.

C.V. Notes

1. Manufacturing is confined to industrial production.
2. All parts exposed to sun radiation – except the areas for markings and registration – must have a white colour surface.
3. For issuance of the Certificate of Airworthiness pertinent to an individual aircraft the Noise Protection Requirements effective on the day of application are applicable.
4. The Variant Certification is effective from Serial No. 11-002 onwards.
5. The optional equipment with 2 x 60 l tanks ex works is allowed according to the modification bulletin Stemme A30-92-077, LBA-approved.
6. The optional equipment with winglets is allowed according to the Service Bulletin Stemme A31-10-023, LBA-approved.
7. VFR Night limited to the vicinity (range of glide ratio) of active airfields approved for night flight operations is allowed when the powered sailplane is equipped for this operation according to national rules and Service Bulletin Stemme A31-10-044 LBA-approved and A31-10-072 EASA-approved.
8. The engine ROTAX 914 F2/S1 (STEMME P/N 11AM-M) is a modification on base of a ROTAX 914 F2 or ROTAX 914 F2-01 in accordance with the Technical Specification Doc-No: A26-11AM-M. This modification is a necessary customization of the basic engine for the use within model STEMME S10-VT. Modified engines on base of a ROTAX 914 F2 may only be used for model STEMME S10-VT.
Section D: Stemme S12

D.I. General

1. Data Sheet No.: EASA.A.054

   15344 Strausberg
   Germany
   Stemme AG
   Flugplatzstrasse F2 Nr. 7
   15344 Strausberg
5. Manufacturer: Stemme AG
6. EASA Certification Application Date: 6. December 2013

D.II. Certification Basis

3. Requirements elected to comply: Standards for Structural Substantiation of Sailplane and
   Powered Sailplane Components Consisting of Glass or
   Standards for the Substantiation of the Electrical System of
4. Special Conditions: EASA SC A.22.1-01 Increased mass up to 900 kg
   Preliminary Standards for the Substantiation of Indirect Drive
   Shafts in Powered Plants of Powered Sailplanes (JAR22)
   (with modification for S10), dated 05.08.1988.
   CRI F-01 Autopilot Installations on Board of Powered
   Sailplanes. Use of a “non TSO” 2-axis auto pilot system (as
   an option).
5. Exemptions: None
6. Equivalent Safety Findings: CS-VLA 725 Limit drop tests
   CS-VLA 726 Ground load dynamic tests
   CS-VLA 727 Reserve energy absorption
   CS-VLA 1309 Equipment, systems, installations
7. Environmental Standards: ICAO Annex 16, Volume I (for more details see EASA
   TCDSN A.054)
D.III. Technical Characteristics and Operational Limitations

1. Type Design Definition: Document Record No. L150-912.005 Rev.00
   In addition:
   Record of Service Bulletins and Airworthiness Directives, Doc.No. P150-981004 in the actual revision.

2. Description: Self-launching, twin-seat, all composite construction powered sailplane, with a liquid cooled, turbo-charged engine mounted in the center fuselage, propeller shaft system and fully foldable, jointed variable pitch propeller CFRP, 5-piece wing, double panel Schempp-Hirth type airbrakes on the upper wing surface, Retractable main landing gear with brake, T-tail (fixed horiz. stabilizer with elevator) fin and rudder.

3. Equipment: Min. Equipment:
   1 Air speed indicator (up to 300 km/h)
   1 Altimeter
   1 Magnetic compass
   1 RPM indicator*
   1 Oil pressure indicator*
   1 Oil temperature indicator*
   1 Cylinder head temperature indicator*
   1 Engine hour meter
   2 Fuel quantity indicator*
   1 Indicator for Takeoff (low pitch) propeller position
   1 Indicator for the trim position
   1 Indicator for Low fuel
   1 Alternator warning light
   1 Outside air temperature gauge, if flown with waterballast in the fin*
   2 4-Point harness (symmetrical)
   2 Automatic or manual parachute
   or
   2 Back cushion (thickness approx. 10 cm / 3.94 in. when compressed), when flying without parachute

   * These instruments can be included in the digital engine monitoring GARMIN G3X Touch system (see Note 7).

   Additional Equipment refer to Flight and Operating Manual.

4. Dimensions: Span

5. **Engine**

   Engine Rotax 914 F2/S1 (P/N 11AM-M) according to Technical Specification Doc.-No: A26-11AM-M Rev 08.a*

   Clutch (P/N: 12AK) according to Assembly drawing Doc.-No.: A12-12AK Rev 01.a* and Parts List Doc.-No.: A21-12AK Rev 01.a*

   Drive System (P/N: 11AS) according to Assembly Drawing Doc.-No.: A12-11AS Rev 03.a* and Parts List Doc.-No.: A21-11AS Rev 02.a*

   Propeller Gear (P/N: 11AG) according to Technical Specification Doc.-No.: A26-11AG Rev 11.a*

   * or later approved revisions.

5.1 **Engine Limits:**

   - Maximum Power RPM: 5800 rpm
   - Maximum Continuous Power RPM: 5500 rpm

6. **Propellers:**

   Stemme 11AP-V
   LBA-Type Certificate Data Sheet 32.100/3 dated Aug. 05th 1997

6.1 **Propeller diameter:**

   1630 mm +/- 3 mm

7. **Fluids and Fluid capacities:**

   - Wing tank left: 60.00 l
   - Wing tank right: 60.00 l
   - Non-usable amount of fuel: 0.52 l

8. **Launching Hooks:**

   None

9. **Weak links:**

   None

10. **Air Speeds:**

    - Manoeuvring Speed: $V_A$ 180 km/h
    - Never Exceed Speed: $V_{NE}$ 270 km/h
    - at flap setting -10°, -5°, 0°: $V_{FE}$ 270 km/h
    - at flap setting +5°, +10°: $V_{FE}$ 180 km/h
    - at flap setting L (+16°): $V_{FE}$ 140 km/h

    Maximum permitted speeds
    - in rough air: $V_{RA}$ 180 km/h
    - max gear operating speed: $V_{LO}$ 140 km/h

11. **Operational Capability:**

    Approved for VFR-Day.

12. **Maximum Masses:**

    - Max. Mass: 900 kg
    - Max. Mass of Non-Lifting Parts: 610 kg
13. Centre of Gravity Range:
Schwerpunktsbereich:
Datum: Inner wing leading edge, where upper side of fuselage
boom placed at slope 1000 : 54
Forward Limit 265 mm aft of datum point
Rearward Limit 420 mm aft of datum point

14. Seating Capacity: 2
15. Lifetime limitations: Refer to Maintenance Manual

D.IV. Operating and Service Instructions

1. Flight manual for the powered sailplane Stemme S12, Edition L400-912810 Rev.00; 01/2016, EASA-approved, or later approved revisions.

D.V. Notes

1. Manufacturing is confined to industrial production.
2. All parts exposed to sun radiation – except the areas for markings and registration – must have a white colour surface.
3. For issuance of the Certificate of Airworthiness pertinent to an individual aircraft the Noise Protection Requirements effective on the day of application are applicable.
4. The Variant Certification is effective from Serial No. 12-002 onwards.
5. Optional use of a non ETSO 2 axis autopilot (Dynon) is included into the certification of the Stemme S12, all wing spans (25 m, 21.7 m and 21.4 m).
6. The engine ROTAX 914 F2/S1 (STEMME P/N 11AM-M) is a modification on base of a ROTAX 914 F2 or ROTAX 914 F2-01 in accordance with the Technical Specification Doc-No: A26-11AM-M. This modification is a necessary customization of the basic engine for the use within model STEMME S12. For the use within the model STEMME S12 the modification must be based on a ROTAX 914 F2-01. Modified engines on base of a ROTAX 914 F2 may only be used for model STEMME S12.
7. Optional use of a non ETSO 2 axis autopilot and digital engine monitoring (GARMIN G3X) is included into the certification of the Stemme S12, all wing spans (25 m, 21.7 m and 21.4 m).
