"NEW TECHNOLOGIES"

A BRAND NEW VIRUS SW-121 PIPISTREL HAS ARRIVED AT THE CLUB

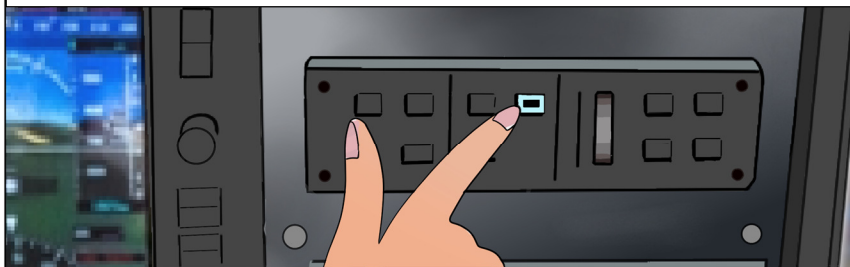

THIS AIRCRAFT WAS CERTIFIED RECENTLY, AND IS EQUIPPED WITH SOME INNOVATIVE TECHNOLOGIES

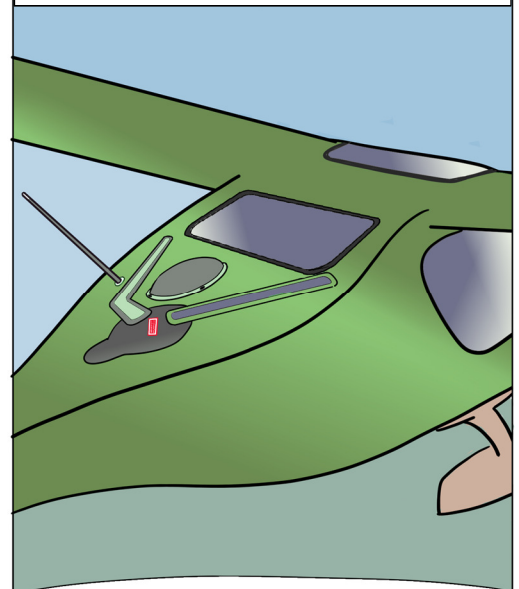

A GLASS COCKPIT, WITH A PRIMARY FLIGHT DISPLAY AND A MULTI-FUNCTION FLIGHT DISPLAY

AN AUTOPILOT WITH AN "AUTO-LEVEL" FUNCTION

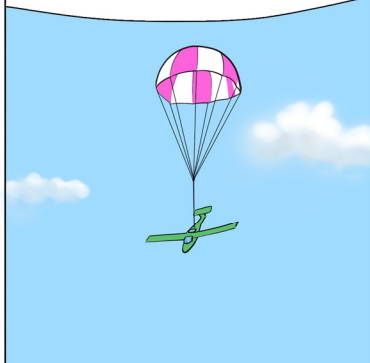

AN EMERGENCY PARACHUTE!

NEW TECHNOLOGIES HELP TO IMPROVE SAFETY, BUT THERE ARE SOME IMPORTANT THINGS TO BEAR IN MIND

REMEMBER! SYNTHETIC VISION EQUIPMENT, AUTOPILOTS AND BALLISTIC PARACHUTES SHOULD NOT BE REASONS TO PUSH THE LIMITS BEYOND THE SCOPE OF THE COMPETENCE AND APPROVAL OF THE PILOT, AND THE TYPE OF AIRCRAFT OPERATION.

TRAINING, FORMAL AND INFORMAL, IS NEEDED IN ORDER TO ENSURE THAT THIS NEW TECHNOLOGY WILL CONTRIBUTE TO IMPROVING SAFETY

You can find links to

- Using advanced technology safely
 - Ballistic parachutes safety
 - Informal training
