WP 4: Competency Development: “Reliability Program including Aircraft Maintenance Program”

This project is funded by the European Union
<http://europa.eu/>

Implemented by: EASA – European Aviation Safety Agency, an
Agency of the European Union <http://www.easa.europa.eu/>

and ECAC - European Civil Aviation Conference for aviation
security <http://www.ecac-ceac.org>

Within the framework of the EU-funded EASA-EaP/CA project in the Eastern Partnership and Central Asian countries, a working session on Reliability Program including Aircraft Maintenance Program was implemented from 14 to 16 November 2018 in Yerevan, Armenia.

The prime objective of this activity was to provide participants with a comprehensive information about reliability and aircraft maintenance programs and to clarify and discuss actual problems and issues in the application of regulatory requirements on real cases.

The workshop was conducted using a combination of theoretical delivery, facilitated discussion, and case studies reviewed as group exercises to re-enforce the learning.

The activity enabled all participants to achieve a better understanding of reliability and aircraft maintenance programs in the context of safety regulatory oversight of organisations in the aeronautical field.

4 subject matter experts from the Civil Aviation Administration of Armenia, attended this activity.
