Trusted to deliver excellence

Rolls-Royce

A Certification/Validation Experience

Rolls-Royce

Principles for airframe/engine interface management

- The engine TC process shall deliver a safe product.
- To the maximum extent possible, all engine related activities shall be performed during engine certification.
- Those activities shall not be further investigated during aircraft certification.
- The regulatory system should not be sensitive to the engine/aircraft interfaces and boundaries.
- The regulatory system between engine and aircraft certification should be consistent
