

Evolution of ramp inspection programmes

Jesper RASMUSSEN
Flight Standards Director

15 June 2017

Your safety is our mission.

Why ramp inspections?

➤ **Product inspection**

- complement system inspections; national oversight, TCO, Safety list
- “Proof of the pudding”

➤ **Added value through:**

- direct safety improvement
- long term safety improvement

➤ **Benefit proven by:**

- Convergence with other safety indicators
- Decreasing number of “odd cases”

Recent findings (not identified by OPR)

Always room for improvement

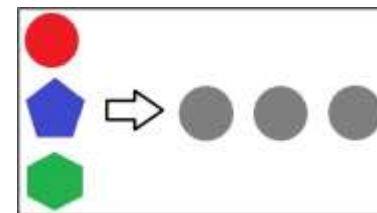

➤ More focus on safety

- Less focus on e.g. documents
- Best use of time by prioritizing safety relevant items

➤ More standardisation

- Within the EU programme
- Amongst all programmes

The way forward

- **A globally harmonised programme!**
 - **However, this would require:**
 - Exchange of sensitive information
 - **confidentiality** concern
 - Harmonised working methods
 - **standardisation** concern
