

European central repository for aviation accident and incident reports (ECCAIRS)

The European Coordination Centre for Accident and Incident Reporting Systems (ECCAIRS) provides the European Central Repository for accident and incident reports in aviation. ECCAIRS implements Directive 2003/42/EC on Occurrence Reporting in Civil Aviation by offering a centralised and standardised way to collect, share and analyse safety data related to aviation accidents and incidents.

Access is restricted to authorized authorities.

DATA used in the RIA is not presented and can not be available until legal clearance. DATA may be publish in the official Notice of proposed amendment.
