

**WP 4: Competency Development:  
Workshop on State Safety Program (SSP)**

Within the framework of the EU-funded Eastern Partnership and Central Asia Project (EaP/CA), a workshop on the State Safety Programme was delivered in Chisinau from 11 to 12 July 2018. It was addressed to the National Safety Committee (Management Board), the regulators of the Civil Aviation Agency (CAA) as well as to the Accountable Executives from the main stakeholders of the Republic of Moldova.

The objective of this workshop was to promote a management system approach to SSP implementation with a view to secure engagement of senior managers for SSP implementation in Moldova. This entailed discussing the benefits of safety risk management at State level, presenting critical success factors, as well as principles for risk- and performance based resource targeting & action planning at State level. The workshop also allowed promoting the benefits of regional cooperation on the basis of the European Aviation Safety Programme (EASP) and the European Plan for Aviation Safety (EPAS).
