

Cologne 30 November 2018

CAW implementation support

In the framework of the EASA-SAAU Ukraine Airworthiness Convergence Project, EASA provided on 29 and 30 November a Continued Airworthiness implementation support training. Its objective was to update participants with an overview of the last regulatory changes affecting regulation (EU) 1321/2014. Additionally, the training covered ground de-icing threads and means for safe winter operations.

Altogether, 29 participants from SAAU attended the course that was delivered by EASA Experts.
