

Review visit by EASA in the field of continuing airworthiness

From 22 to 26 October 2018 EASA conducted a review visit to the State Aviation Administration of Ukraine (SAAU) including visits to Ukrainian industry (State enterprise Plant 410, Azur Airlines Ukraine Airlines LLC)), to verify the progress made in the implementation of the actions listed in the Convergence Document. The visit also addressed the verification of the current levels of EU-based rule implementation in the field of continuing airworthiness.

The visit was held in an open atmosphere and allowed the EASA team to observe the progress made by the SAAU to converge to the system of continuing airworthiness oversight applicable in the EU.
