Workshop on engine and APU certification

On 6 and 7 November, EASA delivered a workshop in Zaporozhye, Ukraine with the objective to provide the participants with a good understanding of engine and APU certification in accordance with EU standards. The workshop addressed an overview of the applicable requirements and included topics such CS-E overview and overview of EASA processes for engine and APU certification.

Altogether 80 training participants from SAAU and the industry attended the workshop that was delivered by EASA experts.
