

Cologne 26 April 2019

Non Destructive Testing On-the-Job Training

From 22 to 26 April a Non-Destructive Testing (NDT) on-the-job training was delivered to the State Aviation Administration of Ukraine (SAAU) and the Ukrainian industry.

The overall objective of the training was to give participants a deeper knowledge of real practices in a maintenance organisation. The activity covered the following topics:

- Refreshment of the NDT training held at SAAU in May 2017;
- Actual practical part in auditing NDT;
- Actual practical part of the use of NDT techniques.

Altogether 13 participants from SAAU attended the training.
