WP 4: Competency Development

On-site support for the development of the Aerodrome certification inspector procedures manual Chisinau, 26 to 30 November 2018

This five-day activity involved assisting/advising the Aerodrome Standards Department of the Moldavian CAA with the development of their “Aerodrome certification inspector procedures manual”, including the associated documentation such as manual, regulations, guidance material and checklists.

This was done via documentation analysis, on-site visit, discussions with stakeholders and report production. The activity was implemented with a collaborative hands-on approach.

This project is funded by the European Union
