

**EASA**  
European Aviation Safety Agency

# Registration

EASA Team

Workshop 24 October 2016

**Your safety is our mission.**

An agency of the European Union 

TE.GEN.00409-001

# *How is registration handled in the prototype regulation (I)?*

- Registration is addressed in the prototype regulation as follows:
  - Article 4 Principles: **Operator** to register and **display registration marks** on all UA it operates when required by UAS. OPEN.30 and UAS. SPEC 40
    - Operator register with competent authority
  - Article 9 Responsibility of competent Authority: establish register of Operators and a register(s) of declarations, authorisations and certificates
  - Article 10 Exchange of safety Information: MS ensure interoperability of registers

## *How is registration handled in the prototype regulation (II)?*

- Registration is addressed in the prototype regulation as follows:
  - UAS. OPEN.30:
    - limit obligation to sub-categories A1 to A3 and when not registered under UAS.SPEC.20
    - Register to MS where Principal Place of business is using Form in appendix 1.1
    - If legal person: form must include description of the organisation and a declaration that remote pilots have appropriate level of competency.
    - Display registration number on UA.
  - UAS. SPEC .20:
    - Limit obligation when not already registered in open category
    - Same requirements as in UAS.OPEN. 30
  - Appendix 1.1:
    - Form

## *Highlight of the comments*

- Simple and effective:
  - Agreed=> On-line; Standard needs to be developed
- Free of charge:
  - Ideally but set-up and maintenance will cost money=> Nominal fee
- Register drones; operators or both:
  - Proposal is operators
- Register all operators:
  - Impractical => proposal is to exclude operators of A0 sub-category
- Not a comment but European Parliament has drafted an amendment proposing as an option an European Register:
  - EASA ready to consider
