WP 3: Competency Development:**Workshop on Runway Safety**

Within the framework of the EU-funded EASA-IPA3 programme on aviation safety in the Western Balkans and Turkey, a workshop on runway safety was delivered in Belgrade from 28 to 29 June 2016. Recent incident or accident reports worldwide have highlighted the importance of this topic and its role in airport safety. The objective of this interactive workshop was therefore to strengthen the capacity of the civil aviation authorities (CAA) of the EASA-IPA3 beneficiary countries in this domain.

The workshop encompassed the Runway Safety Programme, as well as Runway incursion and excursion prevention, both from the perspective of the Aerodrome Operator, Air Navigation Service Provider and Aircraft Operator. It brought together EASA experts and experts from the civil aviation authorities to exchange experience and best practice.

Twelve (12) civil aviation professionals from the CAAs attended the course.
