

Course Syllabus
Revision 28.10.2008

Aircraft Maintenance License - AML

Part-66

General Course

Contents:

- A. The EU legal framework - Principles**
- B. Structure of the EU regulatory system**
- C. Regulation (EC) No. 216/2008**
- D. Commission Regulation (EC) No. 2042/2003 + 707/2006**
- E. General structure of Part-66**
- F. Cross-reference between Part-66 requirements and syllabus' contents**
- G. Detailed contents and level of detail expected (Full contents / Specific paragraphs / Overview)**

A. THE EU LEGAL FRAMEWORK - PRINCIPLES

The Community being a supranational organisation, Member States may no more:

- deviate from common rules;
- impose additional requirements; or
- Conclude arrangements with third countries.

Legislative powers

The Legislator, through the Basic Regulation:

- Defines the scope of powers transferred to the Community (the products, organizations and personnel that will be regulated by the Community to protect public interest)
- Adopts the essential requirements specifying the objectives to be met (the obligations and means to reach the desired level of protection)
- Distributes the executive tasks among the executive agents
- Establishes the means of judicial control when executive powers are given to Community bodies

Executive powers

Certification is carried out:

- By the Agency (when centralized action is more efficient);
- By the National Aviation Authorities (Commission oversight through the Agency).

Judicial powers

Oversight and enforcement are carried out by the national systems, under the supervision of national Courts

The interpretation of Community law is made by the Court of Justice of the European Community.

THE AGENCY:

- Drafts common rules (EASA Regulation and implementing rules)
- Adopts material for the implementation of common rules (airworthiness codes, interpretation and guidance material)
- Issues type certificates (TC, STC,...), approves organisations (DOA and, outside the European territory, POA, MOA...), ensures their continued oversight
- Oversees the application of rules by the Member States and recommends the necessary enforcement actions to the Commission
- Acts as a focal point for third countries and international organizations for the harmonisation of rules and the recognition / validation of certificates

THE MEMBER STATES (NAAS):

- Provide expertise as appropriate for rulemaking tasks
- Develop national administrative rules for the implementation and enforcement of common rules (administrative procedures)
- May take action on a case by case basis if so required to ensure safety or appropriate operational flexibility (safeguards)
- Approve organisations in their territory (except DOs)
- Issue certificates for individual products on their registry
- Issue personnel licences for aircraft maintenance certifying staff (Part-66)

B. STRUCTURE OF THE EU REGULATORY SYSTEM

a) BASIC REGULATION

- The Parliament and the Council define the Scope of Powers transferred from the Member States to the Community
- They adopt the Essential Requirements specifying the objectives to be met
- The Basic Regulation was adopted by the European Parliament and the Council, according to the co-decision procedure
- It defines the scope of Community competence
- It establishes the objectives and principles of Community action
- It establishes the division of regulatory and executive powers between the Agency, the European Institutions and the Member States

b) IMPLEMENTING RULES

The Commission adopts standards for implementing the essential requirements

The Implementing Rules were adopted by the Commission, according to the comitology procedure

They **establish common standards in the fields of airworthiness, continuing airworthiness and environmental protection that:**

- Fulfil the objectives and principles established in the Essential Requirements
- Are in compliance with ICAO SARPs

They define the Competent Authority for the executive functions and establish rules and procedures for its implementation

d) ACCEPTABLE MEANS OF COMPLIANCE

66.B.15 Acceptable means of compliance

The Agency shall develop acceptable means of compliance that the Member States may use to establish compliance with this Part. When the acceptable means of compliance are complied with, the related requirements of this Part shall be considered as met.

C. REGULATION (EC) NO 216/2008

CHAPTER I PRINCIPLES	Article 1 Scope	1. Applicability of the Basic Regulation to products, parts and appliances This Regulation shall apply to : (a) the design, production, maintenance and operation of aeronautical products, parts and appliances, as well as personnel and organisations involved in the design, production and maintenance of such products, parts and appliances ; (b) personnel and organisations involved in the operation of aircraft.	
CHAPTER II SUBSTANTIVE REQUIREMENTS			
Article 4	Basic principles and applicability	1. Aircraft, including any installed product, part and appliance, which are: (a) designed or manufactured by an organisation for which the Agency or a Member State ensures safety oversight ; or (b) registered in a Member State , unless their regulatory safety oversight has been delegated to a third country and they are not used by a Community operator; or (c) registered in a third country and used by an operator for which any Member State ensures oversight of operations, or used into, within or out of the Community by an operator established or residing in the Community ; or (d) registered in a third country, or registered in a Member State which has delegated their regulatory safety oversight to a third country, and used by a third country operator into, within or out of the Community shall comply with this Regulation. 4. Paragraph 1 shall not apply to aircraft referred to in Annex II.	
Article 5	Airworthiness	1. Aircraft referred to in Article 4(1) (a), (b) and (c) shall comply with the essential requirements for airworthiness laid down in Annex I.	

		<p>2. Compliance of aircraft referred to in Article 4(1)(b), and of products, parts and appliances mounted thereon shall be established in accordance with the following.</p> <p>(g) the capability of maintenance training organisations to discharge the responsibilities associated with their privileges in relation to the issuance of the certificates referred to in point (f) may be recognised by the issuance of an approval.</p> <p>5. The measures designed to amend non-essential elements of this Article, by supplementing it, shall be adopted in accordance with the regulatory procedure with scrutiny referred to in Article 65(4). Those measures shall specify in particular:</p> <p>(f) conditions to issue, maintain, amend, suspend or revoke organisation approvals i.a.w. § 2(d), (e) and (g) and conditions under which such approvals need not be requested;</p> <p>(h) responsibilities of the holders of certificates.</p>	
<p>Article 11</p>	<p>Recognition of certificates</p>	<p>1. Member States shall, without further technical requirements or evaluation, recognise the certificates issued in accordance with this Regulation. When the original recognition is for a particular purpose, or purposes, any subsequent recognition shall cover only the same purpose or purpose(s).</p> <p><i>Note: such an "automatic mutual recognition" is possible, provided that the State issuing the certificates is fully compliant with the provisions of the Basic Regulation. If that is not the case (i.e. new Member States accessing the European Union), then this article shall not apply (Refer to Regulation 1962/2006 for a practical example).</i></p> <p>2. The Commission, on its own initiative or at the request of a Member State or of the Agency, may initiate the procedure referred to in Article 65(7) to decide whether a certificate issued in accordance with this Regulation effectively complies with this Regulation and its implementing rules. In case of non-compliance or ineffective compliance, the Commission shall require the issuer of a certificate to take appropriate corrective action and safeguard</p>	

		<p>measures, such as limitation or suspension of the certificate. Moreover, the provisions of paragraph 1 shall cease to apply to the certificate from the date of the notification of the Commission's decision to the Member States.</p> <p>3. When the Commission has sufficient evidence that appropriate corrective action has been taken by the issuer referred to in paragraph 2 to address the case of non-compliance or ineffective compliance and that the safeguard measures are no longer necessary, it shall decide that the provisions of paragraph 1 apply again to this certificate. These provisions shall apply as from the date of the notification of this decision to the Member States.</p>	
Article 14	Flexibility provisions	<p>4. Member States may grant exemptions in the event of unforeseen urgent operational circumstances or operational needs of a limited duration, provided the level of safety is not adversely affected thereby. Appropriate notification.</p>	
Article 18	Agency measures	<p>The Agency shall, where appropriate:</p> <ul style="list-style-type: none"> (a) issue opinions addressed to the Commission; (b) issue recommendations addressed to the Commission for the application of Art. 14; (c) issue certification specifications, including airworthiness codes and acceptable means of compliance, as well as any guidance material for the application of this Regulation and its implementing rules. 	
ANNEX I	Essential requirements for airworthiness referred to in Article 5	<p>3. Organisations</p> <p>3.a. Organisation approvals must be issued when the following conditions are met:</p> <ul style="list-style-type: none"> 3.a.1. the organisation must have all the means necessary for the scope of work. These means comprise, but are not limited to, the following: facilities, personnel, equipment, tools and material, documentation of tasks, responsibilities and procedures, access to relevant data and record-keeping; 3.a.2. the organisation must implement and maintain a management system to ensure compliance with these essential requirements for 	

		<p>airworthiness, and aim for continuous improvement of this system;</p> <p>3.a.3. the organisation must establish arrangements with other relevant organisations, as necessary, to ensure continuing compliance with these essential requirements for airworthiness;</p> <p>3.a.4. the organisation must establish an occurrence reporting and/or handling system, which must be used by the management system under point 3.a.2 and the arrangements under point 3.a.3, in order to contribute to the aim of continuous improvement of the safety of products.</p>	
<p>ANNEX II</p>	<p>Aircraft referred to in Article 4(4)</p>	<p>Art. 4(1), (2) & (3) do not apply to aircraft falling in one or more of the categories below:</p> <p>(a) historic aircraft meeting the criteria below:</p> <p>(i) non complex aircraft whose:</p> <ul style="list-style-type: none"> - initial design was established before 1.1.1955 and - production has been stopped before 1.1.1975 <p style="text-align: center;">Or</p> <p>(ii) aircraft having a clear historical relevance, related to:</p> <ul style="list-style-type: none"> - a participation in a noteworthy historical event; or - a major step in the development of aviation; or - a major role played into the armed forces of a Member State <p>(b) Aircraft specifically designed or modified for research, experimental or scientific purposes, and likely to be produced in very limited numbers.</p> <p>(c) aircraft of which at least 51% is built by an amateur, or a non profit making association of amateurs, for their own purposes and without any commercial objective.</p> <p>(d) Aircraft that have been in the service of military forces, unless the aircraft is of a type for which a design standard has been adopted by the Agency.</p> <p>(e) aeroplanes, helicopters and powered parachutes having no more than two seats, a maximum take-off mass, as recorded by the Member</p>	

		<p>States, of no more than:</p> <ul style="list-style-type: none"> (i) 300 kg for a land plane/helicopter, single seater; or (ii) 450 kg for a land plane/helicopter, two seater; or (iii) 330 kg for an amphibian or floatplane/helicopter single seater; or (iv) 495 kg for an amphibian or floatplane/helicopter two seater, provided that, where operating both as a floatplane/helicopter and as a land plane/helicopter, it falls below both MTOM limits, as appropriate; (v) 472,5 kg for a land plane, two seater equipped with an airframe mounted total recovery parachute system; (vi) 315 kg for a land plane single-seater equipped with an airframe mounted total recovery parachute system; <p>and, for aeroplanes, having the stall speed or the minimum steady flight speed in landing configuration not exceeding 35 knots calibrated air speed (CAS);</p> <ul style="list-style-type: none"> (f) Single and two-seater gyroplanes with a maximum take off mass \leq 560 kg. (g) Gliders with a maximum empty mass, of no more than 80 kg when single seater or 100 kg when two seater, including those which are foot launched. (h) Replicas of aircraft meeting the criteria of (a) or (d) above, for which the structural design is similar to the original aircraft. (i) Unmanned aircraft with an operating mass of no more than 150 kg. (j) Any other aircraft which has a maximum empty mass, including fuel, \leq 70 kg. 	
D. COMMISSION REGULATION (EC) No. 2042/2003 + 707/2006			
Article 1	Objective and scope	<p>1. This Regulation establishes common technical requirements and administrative procedures for ensuring the continuing airworthiness of aircraft, including any component for installation thereto, which are:</p> <ul style="list-style-type: none"> (a) registered in a Member State; or 	

		<p>(b) registered in a third country and used by an operator for which a Member State ensures oversight of operations.</p> <p>2. Paragraph 1 shall not apply to aircraft the regulatory safety oversight of which has been transferred to a third country and which are not used by a Community operator, or to aircraft referred to in Annex II to the basic Regulation.</p> <p>3. The provisions of this Regulation related to commercial air transport are applicable to licensed air carriers as defined by Community law – See below</p>	
Article 2	Definitions	<p>(a) 'aircraft' (c) 'component' (d) 'continuing airworthiness' (g) 'large aircraft'; (h) 'maintenance' (i) 'organisation'; (j) 'pre-flight inspection'</p>	
	Additional definitions related to the Aircraft Maintenance Licence	<p>AML: Aircraft Maintenance Licence (Part-66) is a document issued on the standard EASA Form 26 which permits the holder to exercise privileges (issue Certificates of Release to Service following an aircraft maintenance). Note: For the time being, Part-66 AML considers aircraft maintenance only (Category A, B1, B2 or C AML).</p> <p>Basic knowledge is a level of knowledge in the appropriate subject modules in accordance with Appendix I to the Part-66 (for category/subcategory A, B1, B2) which an applicant for an aircraft maintenance licence or the addition of a category or subcategory to such an aircraft maintenance licence shall demonstrate by examination.</p> <p>Type training / rating refers to an aircraft type training approved by the competent authority or conducted by an appropriately approved Part-147 maintenance training organisation which shall include theoretical and practical elements of the aircraft type and consist of the appropriate course in relation to the licence holder privileges and when theoretical and practical training shall comply with Appendix III to the Part-66</p>	

		<p>Conversion provisions describe the grandfather rights applicable to holders of a certifying staff qualification valid in a Member State, prior to the date of entry into force of the Part-66. Privileges can be transferred to the newly issued Part-66 aircraft maintenance licence without further examination, subject to conditions specified in Part-66 Section B (e.g. endorsement of technical limitations).</p>	
	<p>Article 5 Certifying Staff</p>	<p>1. Certifying staff shall be qualified in accordance with the provisions of Annex III, except as provided for in M.A.607(b) and M.A.803 of Annex I and in 145.A.30(j) of and Appendix IV to Annex II.</p> <p><i>[Annex I: Part-M - M.A.607(b): unforeseen cases, where an aircraft is grounded at a location other than the main base where no appropriate certifying staff is available. M.A.803: For any privately operated aircraft of simple design with a maximum take-off mass of less than 2730 kg, glider and balloon, the pilot-owner may issue the certificate of release to service after limited pilot owner maintenance.</i></p> <p><i>Annex II: Part-145 - 145.A.30(j): organisations facilities and for line maintenance carried out at a line station of an organisation which is located outside the Community territory, limited certification authorisation to flight crew, unforeseen cases where an aircraft is grounded at a location other than the main base where no appropriate certifying staff is available.]</i></p> <p>2. Any aircraft maintenance licence and if any, the technical limitations associated with that licence, issued or recognised by a Member State in accordance with the JAA requirements and procedures and valid at the time of entry into force of this Regulation, shall be deemed to have been issued in accordance with this Regulation.</p>	
<p>E. GENERAL STRUCTURE OF PART-66</p>			
<ul style="list-style-type: none"> • Definition of the Competent Authority (66.1) • Section A: Technical Requirements <ul style="list-style-type: none"> - Subpart A – Aircraft Maintenance Licence Aeroplanes and Helicopters 			

- Subpart B – Aircraft other than Aeroplanes and Helicopters
- Subpart C – Components
- Section B: Procedure for Competent Authorities
 - Subpart A – General
 - Subpart B – Issue of an Aircraft Maintenance Licence
 - Subpart C – Examinations
 - Subpart D – Conversion of National Qualifications
 - Subpart E – Examination Credits
 - Subpart F – Revocation, Suspension or Limitation of the Aircraft Maintenance Licence

G. DETAILED CONTENTS AND LEVEL OF DETAIL EXPECTED (Full contents / Specific Paragraphs / Overview)			
66.1	Competent Authority	The competent authority shall be the authority designated by the Member State to whom a person applies for the issuance of an AML.	<i>Full contents</i>
66.A.15	Eligibility	An applicant for an AML shall be at least 18 years of age.	<i>Full contents</i>
66.A.1	Scope	<p>This section establishes the requirements for the issue of an AML and conditions of its validity and use, for aeroplanes and helicopters of the following categories:</p> <ul style="list-style-type: none"> - Category A - Category B1 - Category B2 - Category C <p>Categories A and B1 are subdivided into subcategories relative to combinations of aeroplanes, helicopters, turbine and piston engines.</p> <p>The subcategories are:</p> <ul style="list-style-type: none"> - A1 and B1.1 Aeroplanes Turbine - A2 and B1.2 Aeroplanes Piston - A3 and B1.3 Helicopters Turbine - A4 and B1.4 Helicopters Piston 	<i>Full contents</i>
66.A.20	Privileges	<p>Applicable privileges subject to compliance with § (b) requirements:</p> <ol style="list-style-type: none"> 1. Privileges of a category A AML. 2. Privileges of a category B1 AML. 3. Privileges of a category B2 AML. 4. Privileges of a category C AML. <p>Requirements for the holder of an AML to exercise certification</p>	<i>Full contents</i>

		<p>privileges:</p> <ol style="list-style-type: none"> 1. compliance with the applicable requirements of Part-M and/or Part-145. 2. recency of experience, or meeting provision for the issue of privileges. 3. ability to read, write, communicate to an understandable level in the language(s) in which the technical documentation and procedures necessary to support the issue of the CRS are written. 	
AMC 66.A.20 (a)	Privileges	<p>Definitions of line and base maintenance. What line maintenance can include. Tasks outside these criteria to be considered base maintenance. Aircraft maintained i.a.w. "progressive" type programmes.</p>	<i>Full contents</i>
AMC 66.A.20 (b)2	Privileges As amended by ED Decision 2007/018/R	<p>Criteria for the required 6 months experience:</p> <ul style="list-style-type: none"> - Duration - Nature of the experience - Cases in which the experience requirement does not apply 	<i>Overview</i>
GM 66.A.20 (a)	Privileges	<p>Individual AML holders need not be restricted to a single category. Provided that each qualification requirement is satisfied, any combination of categories may be granted.</p> <p>Tasks permitted by 66.A.20(a)1 to be certified under cat. A certification authorisation.</p> <p>Meaning of "minor scheduled line maintenance". Criteria according to which category B1 licence permits certification of work involving avionic systems.</p> <p>Category B2 need to be qualified as Cat A in order to carry out simple mechanical tasks and be able to make certifications for such work.</p>	<i>Overview</i>

		What the Cat C certification authorisation permits. The basis for this certification. The principal function of the category C certifying staff.	
GM 66.A.20 (b)3	Privileges	<p>Holders of a Part-66 AML may not exercise certification privileges unless they have a general knowledge of language used within the maintenance environment including common aeronautical terms in the language.</p> <p>What the level of knowledge should be (details). Level of understanding to be compatible with level of certification privileges exercised.</p>	<i>Full contents</i>
66.A.55	Evidence of qualification (Regulation (EC) 707/2006)	Personnel exercising certification privileges must produce their licence, as evidence of qualification, if requested by an authorised person, within 24 hours.	<i>Full contents</i>
66.A.25	Basic knowledge requirements	<p>An applicant for an AML or the addition of a category or subcategory to AML shall demonstrate, by examination, a level of knowledge in the appropriate subject modules i.a.w. Appendix I to this Part.</p> <p>Basic knowledge examinations to be conducted by a Part-147 training organisation or by the competent authority.</p> <p>Full/partial credit against basic knowledge requirements and associated examination shall be given for any other technical qualification considered equivalent by the competent authority to the knowledge standard of this Part.</p> <p>Such credits shall be established i.a.w. Section B, Subpart E.</p>	<i>Full contents</i>
Appendix I	Basic knowledge requirements	<p>1. Knowledge levels - category A, B1, B2 and C AML.</p> <p>Basic knowledge for categories A, B1 and B2 are indicated by the allocation of knowledge levels indicators (1, 2 or 3) against each applicable subject.</p>	<i>Overview</i>

		<p>Category C applicants must meet either the category B1 or the category B2 basic knowledge levels.</p> <p>Knowledge level indicators are defined as follows:</p> <p>Definition of the knowledge level indicators:</p> <p style="padding-left: 40px;">Level 1 - definition, objectives, what the applicant should be able to perform; Level 2 - definition, objectives, what the applicant should be able to perform; Level 3 - definition, objectives, what the applicant should be able to perform.</p> <p>2. Modularisation – description of the matrix, applicable subjects.</p>

GM 66.B.115 (b)	Procedure for the amendment of an AML to include an aircraft type or group	<p>Where the Part-145 AMO conducts the practical training, it must confirm to the competent authority that the trainee has been assessed and has successfully completed the practical elements of type training course to satisfy the requirements of 66.A.45(c). Competent authority shall agree on how practical elements are assessed, e.g. under a procedure or on a case by case basis.</p>	<i>Overview</i>
66.A.40	Continued validity of the AML	<p>AML becomes invalid 5 years after last issue or amendment, unless holder submits it to the competent authority that issued it,</p>	<i>Full contents</i>

		<p>in order to verify that the information contained in the licence is the same as that contained in the competent authority records, pursuant to 66. B.120.</p> <p>Certification privileges based upon AML = invalid as soon as AML is invalid.</p> <p>AML is only valid when issued and/or amended by the competent authority and when the holder has signed the document.</p>	
GM 66.A.40	Continued validity of the AML	<p>Validity of the Part-66 AML is not affected by recency of maintenance experience, whereas the validity of the 66.A.20 <u>privileges</u> is affected by maintenance experience as specified in 66.A.20(a).</p>	<i>Full contents</i>
66.B.120	Procedure for the renewal of an AML validity	<p>Holder of an AML shall complete relevant parts of EASA Form 19 & submit it with his copy of AML to the competent authority that issued the original AML, unless Part-145 AMO has a MOE procedure whereby such organisation may submit the necessary documentation on behalf of the AML holder.</p> <p>Competent authority shall compare holder's AML with the competent authority file and verify any pending revocation, suspension or variation action pursuant to 66.B.500. If the documents are identical and no action is pending pursuant to 66. B.500, the holder's copy shall be renewed for five years and the file endorsed accordingly.</p> <p>If the competent authority file is different from the AML held by the holder:</p> <ul style="list-style-type: none"> • the competent authority shall investigate the reasons for such differences and may choose not to renew the AML; • the competent authority shall inform the licence holder and any known Part-145 or Part-M AMO affected of such fact and shall, if necessary, take action i.a.w. 66.B.500 to revoke, suspend or amend the AML. 	<i>Full contents</i>

<p>AMC 66.B.120</p>	<p>Procedure for the renewal of an AML validity As amended by ED Decision 2007/018/R</p>	<p>Competent authority should not carry out investigation to ensure that AML holder is in current maintenance practice. This is a matter for the AMO in ensuring validity of the certification authorisation.</p> <p>To ensure the continued validity of the certification privileges, the competent authority may request the licence holder for documentary evidence of compliance with 66.A.20(b) when exercising such privileges.</p>	<p><i>Overview</i></p>
<p>66.B.500</p>	<p>Revocation, suspension or limitation of the AML</p>	<p>Competent authority shall suspend, limit or revoke the AML where it has identified a safety issue or if it has clear evidence that the person has carried out or been involved in one or more of the following activities:</p> <ul style="list-style-type: none"> • obtaining the AML and/or the certification privileges by falsification of submitted documentary evidence. • failing to carry out requested maintenance combined with failure to report such fact to the organisation or person who requested the maintenance. • failing to carry out required maintenance resulting from own inspection combined with failure to report such fact to the organisation or person for whom the maintenance was intended to be carried out. • negligent maintenance. • falsification of the maintenance record. • issuing a CRS knowing that the maintenance specified on the CRS has not been carried out or without verifying that such maintenance has been carried out. • carrying out maintenance or issuing a CRS when adversely affected by alcohol or drugs. • issuing CRS while not in compliance with this Part. 	<p><i>Full contents</i></p>
<p>66.B.200</p>	<p>Examination by the competent authority</p>	<p>Secure storage of examination questions prior to an examination, to ensure that candidates will not know which particular questions will be included.</p>	<p><i>Full contents</i></p>

		<p>The competent authority shall nominate those persons who control the questions to be used for each examination. The competent authority shall appoint examiners who shall be present during all examinations to ensure the integrity of the examination.</p> <p>Basic examinations shall follow the standard specified in Appendix I and II.</p> <p>Type examinations must follow the standard specified in Appendix III.</p> <p>New essay questions every six months; used questions = withdrawn or rested from use. A record of questions used shall be retained for reference.</p> <p>All examination papers = handed out at the start of the examination to the candidate & handed back to the examiner at the end of the allotted time. No exam paper may be removed from the exam room during the exam.</p> <p>Only the exam paper may be available to the candidate during the exam, apart from specific documentation needed for type examinations.</p> <p>Examination candidates = separated from each other so that they cannot read each other's examination papers. They may not speak to any person other than the examiner. Candidates proven to be cheating = banned from taking any further exam within 12 months of the date of the exam in which they were found cheating.</p>	
<p>Appendix II</p>	<p>Basic examination standard</p>	<p><u>Standardisation Basis For Examinations</u> All basic examinations = multi-choice question format & essay questions.</p>	<p><i>Overview</i></p>

		<p>Each multi-choice question = three alternative answers of which only one must be the correct answer</p> <p>Allowed a time per module = nominal average of 75 seconds per question.</p> <p>Each essay question = written answer; 20 minutes to answer each question.</p> <p>Essay questions = drafted and evaluated using the knowledge syllabus in Part-66 Appendix I, Modules 7, 9 and 10.</p> <p>Each question = a model answer drafted for it, which will also include any known alternative answers that may be relevant for other subdivisions. Model answer = broken down into a list of important points (Key Points).</p> <p>The pass mark for each module and sub-module multi-choice part = 75 %. The pass mark for each essay question is 75 % (the candidates answer must contain 75 % of the required key points addressed and no significant error related to any required key point).</p> <p>All Part-66 modules that make up a complete Part-66 AML category or subcategory must be passed within a 5 year time period of passing the first module; this does not apply to those modules which are common to more than one Part-66 AML category or subcategory and which were previously passed as part of another such category or subcategory examination. <u>Question Numbers for the Part-66 Appendix I Modules – Overview</u></p>	
<p>Appendix III</p>	<p>Type training and examination standard</p>	<p><u>1. Type training levels</u> Definitions, contents, objectives of each level: Level 1 - General familiarisation Level 2 - Ramp and transit Level 3 - Line and base maintenance training</p>	<p><i>Overview</i></p>

		<p><u>2. Type training standard</u> Type training must include a theoretical and practical element. 2.1. Theoretical element – elements to be covered, levels, cat C staff. 2.2. Practical element – contents, objectives. <u>3. Type training examination standard – requirements.</u> <u>4. Type examination standard (without type training) – requirements.</u></p>	
EXAMINATION CREDITS			
66.A.25	Basic knowledge requirements - § b	<p>Full or partial credit against the basic knowledge requirements and associated examination shall be given for any other technical qualification considered by the competent authority to be equivalent to the knowledge standard of this Part. Such credits shall be established in accordance with Section B, Subpart E of this Part.</p>	
66.B.400	General	<p>Competent authority may only grant examination credit on the basis of an examination credit report prepared i.a.w. 66.B.405. Examination credit report = either developed by the competent authority or approved by the competent authority.</p>	<i>Full contents</i>
66.B.405	Examination credit report	<p>For each technical qualification concerned, the report shall identify the subject matter and knowledge levels contained in App. I relevant to the category being compared.</p> <p>Report shall include a statement of compliance against each subject stating where, in the technical qualification, the equivalent standard can be found.</p> <p>If there is no equivalent standard for the particular subject, the report shall state such facts.</p> <p>Based upon the above comparison, the report shall indicate for each technical qualification concerned the Appendix I subject matters subject to examination credits.</p>	<i>Overview</i>

CONVERSION OF NATIONAL QUALIFICATIONS

<p>66.A.70</p>	<p>Conversion provisions</p>	<p>The holder of a certifying staff qualification valid in a Member State, prior to the date of entry into force of this Part shall be issued an AML without further examination subject to the conditions specified in 66.B.300.</p> <p>A person undergoing a qualification process valid in a Member State, prior to the date of entry into force of this Part may continue to be qualified. The holder of a qualification gained following such qualification process shall be issued an AML without further examination subject to the conditions specified in 66.B.300</p> <p>Where necessary, the AML shall contain technical limitations in relation to the scope of the pre-existing qualification.</p>	<p><i>Full contents</i></p>
<p>AMC 66.A.70</p>	<p>Conversion provisions</p>	<p>Technical limitations = deleted as appropriate when the person satisfactorily sits the relevant conversion examination and gains relevant experience.</p>	<p><i>Full contents</i></p>
