

EASA Certification Information

No.: 2009 – 12

Issued: 10 July 2009

Subject: **Transfer of Type Certificate of BO105 LS A-3 helicopter from EUROCOPTER Canada Ltd. to EUROCOPTER Deutschland GmbH, Germany**

Type Certificate No: Transport Canada: H-94
Luftfahrt Bundesamt: 3058
Austro Control DF 012-ACG

Issue date: 25 February 1991

Issued by: Transport Canada

Holder of the Certificate: Eurocopter Canada Ltd.

Background: The request by the current Holder to transfer its TCCA Type Certificate (TC) No. H-94 to EUROCOPTER Deutschland GmbH has been accepted by EASA as of **19 March 2008**.

In accordance with the international rules and the applicable EASA administrative procedures, upon acceptance of transfer, Eurocopter Deutschland GmbH has endorsed all the responsibilities of the TC holder of BO105 LS A-3 as of **10 July 2009**.

As a consequence, TCCA has cancelled the TC H-94 and incorporated the product into TC H-79. Therefore, EASA has become the primary certifying authority and has issued the Type Certificate R.011, replacing the LBA TC 3058 issued by LBA Germany and ACG TC DF 012-ACG issued by Austro Control. The EASA TCDS can be found on the following website: http://www.easa.europa.eu/ws_prod/c/c_tc_rotorcraft.php.

All airworthiness authorities having Type Certificated BO105 LS A-3 products are invited to reissue their type certificate, or equivalent document, to reflect this TC transfer.

EASA considers that all Airworthiness Directives (ADs) issued by TCCA or LBA Germany related to these products are still applicable unless EASA replaces or cancels them.
