for rulemaking task

RMT.0748 Issue 1

Regular update of the AMC & GM associated with the U-space regulatory framework

OBJECTIVE(S)

In order to effectively support and maintain the alignment of the implementation of the U-space regulatory framework, the current associated AMC and GM should be revised.

The objective of this rulemaking task (RMT) is to enable a continued safe, harmonised, and efficient implementation of U-space, taking due account of lessons learned from the implementation.

This RMT aims at addressing recommendations to improve the efficiency and safety of the implementation, proposals from stakeholders, as well as editorial changes and/or harmonisation between regulations (e.g. with Regulation (EU) 2019/947). It will also consider the feedback from stakeholders discussions during the implementation support task (IST.0003).

To this end, this RMT proposes to amend the current relevant AMC and GM to the U-space regulatory framework.

REGULATIONS INTENDED TO BE AMENDED/ISSUED

n/a

EASA DECISIONS INTENDED TO BE AMENDED

- ED Decision 2022/022/R
- ED Decision 2022/023/R
- ED Decision 2022/024/R

AFFECTED STAKEHOLDERS

National competent authorities, U-space service providers, common information service providers, UAS operators, air operators, any stakeholders affected by the U-space requirements.

WORKING METHOD(S)

Development	Impact Assessment(s)	Consultation
By EASA with external support	Light	Focused – NPA (affected parties/experts)

PLANNING MILESTONES: See *Volume II* of the latest EPAS edition.
