Can you give me the name of Part 145 (MOA) organisations in [EASA member state]?

Answer

According to the Part 145.1 EASA is the competent authority for organisations located outside the EU territories. Within the EU Member States each National Aviation Authority (NAA) is the competent authority.

In accordance with above specified regulatory paragraph, EASA publishes the [list of valid and non-valid Foreign EASA Part-145 approvals located outside of the EU Member States](#) which are issued by EASA.

Following the same reference each EU NAA is tasked to issue a similar list of approvals granted on its own territory. Unfortunately not all EU NAA do have such a list of national approvals or even a website.

For the moment we can provide you with the [list of EASA member states on our website](#).

We have a Part 145 approval from a national authorities that has no Bilateral Aviation Safety Agreement with EASA. Now we are looking for an EASA 145 approval. What is to be done with regard to procedures, requirements and fee structure?

Answer

On our [Foreign part-145 organisations page](#) you will find useful information with regard to the requirements, the timeframe and the approval procedure.

Furthermore please consult also the User Guide for Applicants for [Foreign Part-145 approvals](#) and the application form [EASA FORM 2](#).

Please note that the EASA Fees & Charges Regulation (Commission Regulation (EU) 319/2014) has entered into force on 01 April 2014.

For further information please consult the [Fees & Charges FAQ](#).

Please review especially table 9 of the Fees & Charges Regulation (Commission Regulation (EU) 319/2014).

Is it mandatory to hold a maintenance organization approval from a local NAA prior to applying EASA for an EASA Part-145 approval or is it possible to apply EASA directly without any approval from local CAA?

Answer

Please note that it is not mandatory to be an approved maintenance organisation from local CAA in country without bilateral agreement prior to applying for an EASA Part-145 approval for certain ratings and we confirm that it is possible to apply to EASA directly without any approval from local CAA.

We are an FAA Repair station and would like to apply for an initial application to EASA Part-145?

Answer

We kindly ask you to consult our [EASA Part-145 organisations located in the USA](#)

There you will find useful information with regard to the requirements, approval procedure and the fees & charges.

Please review [EASA-FAA \(MAG\) for US approved organisations subject to Agreement between the United States of America and the European Community on cooperation in the regulation of civil aviation safety](#) (as of 01 June 2016 currently at change 6)

It is required to complete [EASA FORM 16](#) which should be submitted to your Principal Maintenance Inspector (PMI) at FAA. Please contact your PMI at FAA.

Link:

<https://www.easa.europa.eu/sl/faq/21948>

We are an FAA Repair station and would like to apply for renewal of our EASA Part-145 approval?

Answer

According to the MAG CHANGE 6 "it is the applicants responsibility to prepare the renewal package in time to receive the new certificate. Typically, this should occur 90 days prior to the expiration."

With regard to timing, these actions for renewal are completely disconnected from the applicant's obligation to comply with EASAs Fees and Charges Regulation. Therefore please do not wait for the EASA invoice and proceed with the renewal process within the timeframe specified in the MAG.

Please submit the completed EASA FORM 16 to your PMI at FAA.

As soon as we will receive the complete continuation package from the FAA including EASA FORM 16, EASA FORM 9, Air Agency Certificate, operation specifications and repair station

profile we will confirm receipt to the FAA and to your organisation.

Currently EASA sends out the invoices 60 days after the renewal of the approval. Payment shall be made only after the receipt of the invoice.

<https://www.easa.europa.eu/sl/faq/21954>

How can I apply for an EASA Part-147 approval?

Answer

In order to apply for an EASA Part 147 Approval, it is required to send an application [EASA](#)

[form 12](#) together with a copy of the Certificate of Incorporation of the organisation (translated in English where necessary).

The scope of approval applied for should be detailed as much as possible, and the number of staff to be declared in the application form should be limited to the staffs –included contractors- that will be actively involved into the Part 147 operations. The type and number of courses and the number of facilities should be mentioned on the application form.

Following the reception of the application form 12, an eligibility check will be carried out; the purpose of the eligibility check is to ensure that the scope of the application is relevant, but also that the certification process can be carried out in a reasonably timely manner, taking into account -in particular- the availability of EASA surveyors. Please also note that travelling arrangements are subject to a risk assessment and surveyors may not be allowed to travel to certain regions/ countries.

Once an application has been accepted, an estimate of the fees shall be provided to the applicant and upon acceptance the invoice related to the initial certification task shall be submitted. The contact details of the surveyor will be provided to the applicant and he is requested to contact the surveyor in order to organise the review of documents (MTOE, courses, exam questions...) as well as the schedule for the initial certification audit.

[Download the User Guide regarding the certification process](#)

For further questions regarding our fees and charges please consult the Fees & Charges Regulation (Commission Regulation (EC) 319/2014) which has entered into force on 01 April 2014 [Commission Regulation \(EU\) No 319/2014](#). Please review especially table 10 of the Fees & Charges Regulation (Commission Regulation (EU) 319/2014). For further information visit our [Fees & Charges FAQ's](#)

This regulation is used to determine the applicable initial fees, and then the annual oversight fees. Please note that the fees are subject to an annual inflation rate and do **not** include the travel costs associated to on-site audits (flight & train tickets, accommodation and travel hours - which are charged on an hourly rate basis- etc...). These will be charged separately.

How can I apply for a Part-66 licence?

Answer

If you want to get a Part 66 licence, you have to comply with the [Part-66](#) requirements (in particular, 66.A.10 Applications and for experience: 66.A.25 “Basic knowledge requirements”, item (a), and 66.A.30 “Experience Requirements”).

You can find this information in the EASA Web Page at the following link:

The basic knowledge requirements must be demonstrated by examination. These examinations can be performed either in a Part-147 training organisation approved by a EU Member State or as delivered by the competent authorities of the EU Member State where you may intend to apply for a licence. [View the list of the foreign EASA approved Part-147 organisations](#)

What else do I need to know on the Surveillance Fee for holders of EASA Production Organisation Approvals?

Answer

After the issuance of the Production Organisation Approval, EASA will levy per period of twelve (12) months an annual surveillance fee in accordance with **Table 10 of Part I of the Annex** to this Regulation (**refer to Surveillance fee**), for the purpose of maintaining the certificate. The first 12-month period starts on the date on which the certificate is issued.

The revised Regulation introduces two new criteria to determine the applicable fees:

Number of related staff

- Staff related below 100
- Between 100 and 499
- Between 500 and 999
- Between 1 000 and 4 999
- Between 5 000 and 20 000
- Over 20 000

Highest Priced Product

- Below EUR 5 000
- Between EUR 5 000 and 100 000
- Above EUR 100 000

"Number of related staff": The information must reflect the number of staff, or in case of an initial approval the intended number of staff, for the complete activities to be covered by the approval and therefore must include also any associated administrative staff.

"Highest Priced Product": Value (as mentioned in the relevant manufacturer's list prices) of the most expensive product, part or non-installed equipment that is included in the approved POA

scope of work (capability list) of the EASA POA holder.

The amounts referred to in **Part I of the Annex** shall be indexed, with effect of 01 January each year, to the inflation rate in accordance with the method set out in **Part IV of the Annex**.

Please note that the above summary of the related provisions of the Fees & Charges regulation is provided for convenience only. If, at any time, there is a discrepancy, inconsistency or conflict between the information provided above and information in the Commission Implementing Regulation (EU) 2019/2153, the latter shall prevail.

Applications Gateway

What is the Applications Gateway process?

Answer

In case of temporary capacity shortages on the side of EASA or EASA subcontracted National Aviation Authorities (NAA)/Qualified Entities (QE), the Agency reserves the right to delay the

start of the technical work for certain applications.

The gateway process is introduced to ensure that affected applications are managed in a transparent, objective, and consistent manner.

The following types of applications may be affected if they require a high amount of and/or specific resources that are unavailable at the time of application:

- New applications for Certification tasks and services or requests for registration of declarations
- New applications for Organisation approvals or requests for registration of declarations

The process will not be applied for:

- Ongoing projects (interruptions are possible at applicant request, refer to [FAQ n. 21898](#))
- Continuing Airworthiness activities for EASA approved and declared products
- Oversight activities for EASA approved and declared organisations (including renewals)

Gateway steps

- **CRITERIA:** Applications are selected for the gateway in case of high shortage of EASA/NAA/QE capacity, high project workload, long project duration, high project impact on other ongoing EASA activities
- **DURATION:** A tentative gateway end date is communicated to the applicant following gateway selection
- **COSTS:** No Fees and Charges are raised until the application is released from the gateway process

RULES: The original application date remains the reference date for application (for project duration, Part 21 certification basis)
