Safety, Security, Compliance Services - EACL

Develop and implement the easyJet biosecurity standard

People and Organisation change

SAFETY, SECURITY & COMPLIANCE

> Principle SOC

- Optimisation: *Consider commercial, operational and safety goals together, not in isolation.*

> Put Risk at the centre of everything we do

- All risks assessed and additional controls implemented as necessary
- Formal risk acceptance by risk owners

> Operational Readiness (OPR)

- Operational readiness ensures that the right people are in the right places at the right times, working with the right hardware according to the right procedures and management controls, and are functioning in a favourable physical and psychological environment.

> Governance structure
