

# Notice of Proposed Amendment 2018-13

## Appendix I to AMC to Annex III (Part-66)

### Aircraft type ratings for Part-66 aircraft maintenance licences

RMT.0541 (66.024)

#### EXECUTIVE SUMMARY

This Notice of Proposed Amendment (NPA) addresses a regulatory coordination issue related to aircraft type ratings.

According to the AMC to Annex III (Part-66), type ratings should be endorsed on an aircraft maintenance licence (AML) in accordance with Appendix I to AMC to Part-66 'List of type ratings'.

An NPA is issued regularly to amend this list, after assessing feedback received from the industry, and to add new aircraft types or to remove aircraft types whose type certificate (TC) has been revoked or surrendered.

This NPA adds also the tables of the new Group as a consequence of the introduction of the 'L' licence subcategories by Commission Regulation (EU) 2018/1142.

The main objective is to ensure a common standard throughout the Member States.

## 1. About this NPA

### 1.1. How this NPA was developed

The European Aviation Safety Agency (EASA) developed this NPA in line with Regulation (EU) 2018/1139<sup>1</sup> (hereinafter referred to as the 'Basic Regulation') and the Rulemaking Procedure<sup>2</sup>. This rulemaking activity is included in the European Plan for Aviation Safety (EPAS)<sup>3</sup> under rulemaking task RMT.0541 (66.024). The text of this NPA has been developed by EASA based on recommendations provided by the industry and type certificate lists produced by the EASA's Certification Directorate. It is hereby submitted to all interested parties<sup>4</sup> for consultation.

### 1.2. How to comment on this NPA

Please submit your comments using the automated **Comment-Response Tool (CRT)** available at <http://hub.easa.europa.eu/crt/><sup>5</sup>.

The deadline for submission of comments is **5 March 2019**.

### 1.3. The next steps

Following the closing of the public commenting period, EASA will review all comments.

Based on the comments received, EASA will develop a decision that amends Appendix I 'Aircraft type ratings for Part-66 aircraft maintenance licences' to the Annex 'Acceptable Means of Compliance to Part-66' to Decision 2017/016/RM of the Executive Director of the Agency of 1 June 2017<sup>6</sup>.

The comments received and the EASA responses to them will be reflected in a comment-response document (CRD). The CRD will be appended to the decision.

<sup>1</sup> Regulation (EU) 2018/1139 of the European Parliament and of the Council of 4 July 2018 on common rules in the field of civil aviation and establishing a European Union Aviation Safety Agency, and amending Regulations (EC) No 2111/2005, (EC) No 1008/2008, (EU) No 996/2010, (EU) No 376/2014 and Directives 2014/30/EU and 2014/53/EU of the European Parliament and of the Council, and repealing Regulations (EC) No 552/2004 and (EC) No 216/2008 of the European Parliament and of the Council and Council Regulation (EEC) No 3922/91 (OJ L 212, 22.8.2018, p. 1) (<https://eur-lex.europa.eu/legal-content/EN/TXT/?qid=1535612134845&uri=CELEX:32018R1139>).

<sup>2</sup> EASA is bound to follow a structured rulemaking process as required by Article 115(1) of Regulation (EU) 2018/1139. Such a process has been adopted by the EASA Management Board (MB) and is referred to as the 'Rulemaking Procedure'. See MB Decision No 18-2015 of 15 December 2015 replacing Decision 01/2012 concerning the procedure to be applied by EASA for the issuing of opinions, certification specifications and guidance material (<http://www.easa.europa.eu/the-agency/management-board/decisions/easa-mb-decision-18-2015-rulemaking-procedure>).

<sup>3</sup> <http://easa.europa.eu/rulemaking/annual-programme-and-planning.php>

<sup>4</sup> In accordance with Article 115 of Regulation (EU) 2018/1139, and Articles 6(3) and 7 of the Rulemaking Procedure.

<sup>5</sup> In case of technical problems, please contact the CRT webmaster ([crt@easa.europa.eu](mailto:crt@easa.europa.eu)).

<sup>6</sup> Executive Director Decision 2017/016/R of 1 June 2017 amending the Appendix I to Acceptable Means of Compliance to Part-66 of Regulation (EU) No 1321/2014 — Aircraft type ratings for Part-66 aircraft maintenance licences (AMC/GM to Part-66 — Issue 2, Amendment 2) (<https://www.easa.europa.eu/document-library/agency-decisions/ed-decision-2017016r>).

## 2. In summary — why and what

### 2.1. Why we need to change the rules — issue/rationale

The purpose of this NPA is to update Appendix I 'Aircraft type ratings for Part-66 aircraft maintenance licences' to the Annex 'Acceptable Means of Compliance to Part-66' to Decision 2017/016/RM of the Executive Director of the Agency of 1 June 2017.

### 2.2. What we want to achieve — objectives

The overall objectives of the EASA system are defined in Article 1 of the Basic Regulation. The specific objective of this proposal is to compile a list of aircraft type ratings (aircraft/engine combinations) to promote a common standard throughout the Member States. This requires frequent amendments of Appendix I to keep it up to date.

### 2.3. How we want to achieve it — overview of the proposals

This NPA introduces:

- updates of the type rating lists due to the addition of new models (up to end of October 2018) or deletion of old models that review the current EASA Products type certificate/supplemental type certificate (TC/STC) lists;
- a new table for Group 1 Gas Airships other than ELA2;
- new tables for Group 4 aircraft;
- corrections of type certificate holder/supplemental type certificate holder (TCH/STCH) names, models, commercial designations and type ratings according to the content of the related type certificate data sheet/supplemental type certificate data sheet (TCDS/STCDS);
- changes in the content of 'Notes' (e.g. insertion of the operational suitability data (OSD) approval dates, STC references, ELA1/ELA2 info for aeroplanes and Group 4 aircraft);
- corrections of typos or other minor errors.

## 2.4. Details of the changes

Gr.	Product type	TC/STC Holder	Model	Comm. design. (or Type of struct.)	Part-66 type rating endorsement	NOTE	Reason for the change
±	Aeropl.	AIRBUS	A320-111	-	<del>Airbus A318/A319/A320/A321 (CFM56)</del>	TC no longer valid	Model deleted because the TC is no longer valid.

4	Introduction of new tables for Group 4 aircraft.						

### 3. Proposed amendments

The text of the amendment is arranged to show deleted text, new or amended text as shown below:

- deleted text is ~~struck through~~;
- new or amended text is highlighted in grey;
- an ellipsis '[...]' indicates that the rest of the text is unchanged.

#### 3.1. Draft Appendix I to AMC to Annex III (Part-66)

## Appendix I — Aircraft Type Ratings for Part-66 Aircraft Maintenance Licences

The following aircraft type ratings should be used to ensure a common standard throughout the Member States. In order to keep this list up to date, ~~in case~~ if a Member State needs to issue a type rating that is not included in this list, the information should be passed on to EASA using the EASA 'Contact us' webpage (<https://www.easa.europa.eu/contact-us>).

The tables may erroneously contain aircraft models that fall within the definition of Annex I aircraft of Regulation (EU) 2018/1139. The requirements of Part-66 do not apply to these aircraft.

#### Notes on TR endorsement covering several models/variants:

The endorsement of a type rating (TR) on the aircraft maintenance licence (AML) covering several models/variants does not automatically imply that the AML holder has acquired the appropriate knowledge on each model/variant. ~~In fact, the AML holder may only have received TR training and/or gained experience that was~~ The TR course received or the experience the AML holder has gained, may have been limited to one or several model(s)/variant(s).

To demonstrate adequate competence on the relevant model(s)/variant(s), the AML holder and/or the maintenance organisation where the AML holder is contracted/employed is (are) responsible to verify ~~whether~~ that the model/variant has been adequately covered by the TR course or gained experience and is up to date. Further explanation can be found in AMC 66.A.20(b)3 and AMC 145.A.35(a).

#### Notes on when and how the licences should be modified:

If applicable, licences shall be endorsed with the amended type ratings, whenever the licensing authority deems it necessary or the holder requests it; however, not later than the next licence renewal.

~~When a modification is introduced by this Decision to an aircraft type rating or to an engine designation in the rating which affects licences already issued, the ratings on the (AMLs) may be modified at the next AML renewal or reissue or when the licence is reissued, unless there is an urgent reason to modify the licence.~~

The instructions on how to endorse a modified type rating (for example, in the case of combined or split TRs) are included in the explanatory notes to the decision (ref.: Details of the changes).

Notes on aircraft modified by a Supplemental Type Certificate (STC):

- This Appendix intends to include the type ratings of aircraft resulting from STCs for installation of another a different engine. These STCs are those approved by EASA and those approved by the Member States before 2003 and grandfathered by EASA. Other STCs other than those for engines are not considered.
    - Example: The STC from JET AVIATION AG approved by the LBA for replacement of GE CF 700 by Honeywell TFE731 on Fan Jet Falcon Series E, results in a new rating called ‘Falcon 20E (Honeywell TFE731)’.
  - However, the ratings from STCs for installation of an engine:
    - on part of the original airframe models, or
    - from the same manufacturer, but of a type very similar to the original one, have not been added because they would have resulted in an already existing rating.
- Examples:
- The STC from SILVERHAWK CONVERSIONS approved by EASA for installation of PT6A-135A on Beech C90, C90A and E90 would result in the Beech C90/C90A/E90 (PWC PT6) rating, but this is not listed because it is already included in the original Beech 90 Series (PWC PT6) rating.
  - The STC from Air-Service Wildgruber GmbH approved by LBA for replacement of PWC PT6A-20 by PWC PT6A-27 would result in the De Havilland DHC-6-100 (PWC PT6) rating, but this is not listed because it is already included in the De Havilland DHC-6 (PWC PT6) rating in the table.
- EASA has not received all the information concerning STCs that have been previously approved by the Member States. As a result, not all STCs are considered by this publication.
  - When the STC concerns the installation of an engine that falls under a different subcategory, e.g. replacement of a piston engine by a ~~turbo-prop~~ turboprop (a turbine engine), then the new type rating requires the endorsement in the needs to be listed in the new subcategory after meeting all the relevant criteria.
  - In case a type rating resulting from an STC has not been yet defined by EASA, the latter shall be contacted by the competent authority to agree on a new type rating to be used.

In the following tables:

- The column ‘TC Holder’ includes the TC holder as defined in the type certificate data sheets (TCDS) (EASA, FAA or other) or the Specific Airworthiness Specifications (SAS).
- The column ‘STC Holder’ includes the STC holder as defined in the supplemental type certificate data sheets (STCDS) (EASA, FAA or other).
- Some TC holders’ designations have been corrected to add the information: ‘Aircraft with an SAS’, this means that the aircraft listed under this TC holder designation is considered to be an ‘orphan aircraft’.
- In Group 3, the column ‘Type of structure’, intends to assist the competent authorities in identifying the experience required for this type with a view to removing existing limitations on the licence.
- In Group 4, the column ‘Type of structure’ intends to assist the competent authorities in identifying the required ‘L’ subcategories.
- Wooden structure covered with fabric is considered to fall under wooden structure. For aeroplanes with a combination of structures, e.g. metal tubing fuselage and wooden wings, both experiences ‘metal tube covered with fabric’ and ‘wooden structure’ are required.
- In Group 3, the column ‘MTOM’ intends to assist the competent authorities in identifying the aeroplanes types where the maximum take-off mass (MTOM) is:
  - above 2t and is subject to a B1.2 licence, or

- 2t and below and is subject to a B1.2 or B3 licence.
- The column 'NOTE' in every table includes some necessary information, when relevant, e.g.:
  - ELA1 or ELA2 aircraft.
  - 'OSD Approved' or 'Pending OSD Approval' means that an OSD-MCS (operational suitability data for maintenance certifying staff) exists or is still under the approval process at the date of publication of this ED Decision. OSD data is owned by the TCH (see TCHs contact list: <https://www.easa.europa.eu/document-library/operational-suitability-data/osd-contact-list>). Type training courses approved before the approval of the OSD-MCS, shall include the OSD elements within 2 two years after the OSD-MCS approval.
  - ~~'TC no longer valid' means that the type certificate has been either revoked or surrendered. TR endorsement should be removed from the AML at the next renewal, or can be kept in the AML at the discretion of the Competent Authority.~~
  - STC reference number.
- 'TC not yet released' means that the type certificate has not yet been released by EASA at the date of publication of this ED Decision, but the final model configuration is sufficiently mature/known that the type rating endorsement can be already defined.

#### **4. Impact assessment (IA)**

No impact assessment has been conducted for these proposed amendments because each decision is a regular update with no significant impact expected.

Instructions on how to endorse a modified type rating (for example, in case of combined or split TRs) have been included in the explanatory notes to eliminate the risk of losing the rights already acquired with the previous type rating endorsement.

#### **5. Proposed actions to support implementation**

N/A

## 6. References

### 6.1. Affected regulations

Annex III (Part-66) to Commission Regulation (EU) No 1321/2014 of 26 November 2014, as amended, on the continuing airworthiness of aircraft and aeronautical products, parts and appliances, and on the approval of organisations and personnel involved in these tasks (OJ L 362, 17.12.2014, p. 1)

### 6.2. Affected decisions

Executive Director Decision 2017/016/R of 1 June 2017 amending the Appendix I to Acceptable Means of Compliance to Part-66 of Regulation (EU) No 1321/2014 — Aircraft type ratings for Part-66 aircraft maintenance licences (AMC/GM to Part-66 — Issue 2, Amendment 2)
