

EASA
European Aviation Safety Agency

EASA Level of Involvement (LOI) project

Alain Leroy

Head of Large Aeroplanes Department

19 November 2015

Your safety is our mission.

An agency of the European Union 

TE.GEN.00409-001

Content

- Objectives
- Main Principles
- Rulemaking
- Guidance Material
- Applicability to GA

Main Objectives

- Comply with ICAO Annex 19: State safety management: risk based oversight
- Codify risk based approach in product certification
 - threat: a non-detected non-compliance
- Consistent LOI, based on (safety risk) criteria
- Develop more synergies and feedback loops between product certification and DOA oversight

Additional objectives of NPA

- Alignment with Basic Regulation
- Separate requirements for applicant from requirements for authority
- Improve Part 21 related to product certification

Main Principles

- Builds on certification programme
- Defines Agency's responsibility in product certification
- Confirms responsibility of applicant
- Codifies current practice
- creates legal certainty

Main Principles

- Level of involvement = selection of the compliance demonstration items that the Agency will investigate and the depth of those investigations
- Criteria for establishing LOI:
 - Novel or unusual features
 - Criticality of design
 - Performance of DO
- TC issued when
 - Applicant has declared compliance
 - Agency has not found any non-compliance

Main Principles

- Possible new DOA privilege:
When DOA has shown capability in similar project
 - Approve non-significant major changes
 - Issue STCs (non-significant)
 - Approve any major repair

Rule development process so far

- TOR + concept paper (including proposed changes to Part-21) issued 27-08-2013
- Agency task, but in consultation with LOI industry group (14 meetings held)
- NPA 2015-03 with rule and main AMC/GM: issued 2 March 2015
- 345 comments from 38 commenters
- Comments generally positive

Schedule

- Comment response work ongoing by Agency with help from LOI industry group
- Opinion: 1Q 2016
- guidance material:
 - Certification Memos (CM)
 - Internal Agency procedures (WI)using experience from pilot projects to be issued in coming months

LOI guidance

- WI: DOA dashboard to define EASA oversight
 - IT tool: DOA scoreboard
- WI: Decision process for the determination of LOI

3. DECISION PROCESS FOR SIMPLE PROJECTS

The decision process is the same for all simple projects, whatever the product:

	Minor design change, repair	Simple projects
Applicant	Reserved for future use	Proposes (P)
Expert		Reviews (R)
PCM		Decides (D)
Senior Expert		R (escalation)
HoS of the product line		D (escalation)
Chief expert		
HoD of the product line		

LOI guidance

➤ 2 CMs:

➤ Generic criteria for establishing LOI

➤ form supporting the decision of the Agency on its LOI

LOI guidance

More guidance needed:

- domain specific guidance on novelty and criticality. Will be detailed in specific Certification Memos

When CMs mature: include in AMC/GM

LOI guidance

➤ LOI : 4 classes

- Level Z: familiarisation and cert programme review
- Level L: cert programme and cert plans acceptance
- Level M: L + some detailed test plans acceptance and certification summary acceptance
- Level H: M + some certification reports acceptance or witnessing or participation in some tests

Applicability to GA

- Rule also applicable to AP-DOA and ‘certification programme only’
- But:
 - First get LOI working for DOA
 - Principles of guidance can also be applied to AP-DOA and CP only
 - Next step: adapt guidance
 - Future: rulemaking task ‘Part-21 light’

EASA
