

**FAQs:**

[Responsibilities as a drone operator or remote pilot in the 'specific' category,](#)  
[Specific category,](#) [Drones \(UAS\),](#) [Regulations](#)

**Question:**

**What are my responsibilities as a drone operator in the 'specific' category?**

**Answer:**

As a drone operator flying in the 'specific' category, you **must**:

- ensure that the drone displays the drone operator registration number (e.g. with a sticker) and the same number is uploaded into the remote identification;
- develop operational procedures (written procedures are required when the drone operator employs more than one remote pilot, otherwise it is enough that the remote pilot follows the procedures defined by the manufacturer in the user's manual);
- ensure that there is no radio interference that may affect the command and control link of the drone;
- designate a remote pilot for each operation; it is important that it is clear who is the person responsible for each flight;
- ensure that the remote pilot and the personnel supporting the operation of the drone are familiar with the user's manual and with the drone operator's procedures, have appropriate competency, and are provided with the relevant information concerning any geographical zones published by the MS;
- ensure that the maps in the geo-awareness system of the drone are up to date, unless you are flying in a geographical zone where geo-awareness is not required;
- ensure that, unless you are using a privately built drone, it has a declaration in conformity to the CE class mark and its class label (0 to 4) is affixed to the aircraft; and
- ensure that the persons involved in the operation of the drone is aware of the risks involved in operations under subcategories A2 and A3.
- carry out each operation within the limitations defined in the declaration or

operational authorisation;

- develop procedures to ensure the security of the operation;
- establish measures against unlawful interference and unauthorised access;
- ensure that the privacy of people is protected, and there may also be a requirement to conduct a data protection impact assessment if requested by the National Aviation Authority;
- provide the remote pilot with guidelines on how to minimise the nuisance caused by noise and emissions;
- ensure that the pilot conducting the operation and the other personnel in charge comply with all the conditions required for operating in the 'specific' category;
- keep a record of the drone operation; and
- maintain the drone in a suitable condition to ensure safe operation.
