

FAQ n.136182

FAQs:

[Aircrew training and licensing - Restrictive measures Russia](#), [EU restrictive measures against Russia](#)

Question:

Is it allowed to issue a validation of a pilot licence to a Russian citizen, for example if the pilot flies for an EU-based company?

Answer:

The same restrictions as for other training, testing and checking activities should apply here. However, competent authorities are reminded that licence validation may necessitate contacting the Russian licensing authorities, which is currently not feasible.
