

Dushanbe, December 2019

Work Package 2

Safety Oversight System – Follow-up Republic of Tajikistan

Within the framework of the EU-funded Eastern Partnership and Central Asia Project (EaP/CA), on-site support to Tajikistan was provided from 16 to 20 December 2019 to continue strengthening the organisational structure (safety oversight system) within the country's Civil Aviation Authority.

The implementation of these tailor-made activities is stemming from the Final Report/results of comprehensive evaluation of Tajikistan CAA's safety oversight system performed in 2018. The 2019 support included the following activities:

- ✓ Onsite support for introducing a new organisational structure according to the latest international standards for a civil aviation administration system (including quality management);
- ✓ Onsite support for developing, to the extent possible, an Organisational Manual, including the definition of the State's Safety oversight functions; description of the structure; definition of functions and responsibilities of each unit; definition of mechanisms for coordination between departments; and references to the procedures, job descriptions, and training policy according to the latest international standards for civil aviation administration systems.

This project is funded by the European Union
